CAREER OBJECTIVE

I aim to be an ever-growing and curious Software Engineer. Certified in Full Stack MERN, Front End Dev, and Scrum Master. I am passionate about software implementation and web-based programming. My work experience is in project management in a SaaS environment. I excel in problem-solving in collaborative teams and refactoring not only code, but fundamental systems to achieve the bigger goals. I am skilled at connecting and building rapport with people from various backgrounds. I have been celebrated for my effective communication with stakeholders to ensure we all share the same goals regarding build, functionality, and deliverables.

EXPERIENCE

Software Engineer Student

University of California, Berkeley - GPA 95.5

September 2023 - December 2025 / Virtual

PROJECTS

Problem Solving

Project Management

Strategic Planning

Agile Methodologies

➤ Supervised the onboarding of newly contracted customers on the HSCloud Suite platform, maintaining control of the project from start to finish

➤ Built PMO wiki with Confluence, allowing project managers to be more independent

➤ Created supporting documents as needed for PMO to have more consistency across the division and between projects, no matter which was assigned as manager

➤ Created and revised systems and procedures by analyzing operating practices, evaluating personnel and technological requirements, and implementing changes

➤ Guided employee actions by researching, developing, writing, and updating administrative policies, procedures, methods, and guidelines

Product and Implementation Manager

HS GovTech Solutions Inc.

January 2019 - January 2022 / Remote

➤ Managed and implemented concurrent projects using agile methodologies and scrum frameworks; co-led 21 projects while simultaneously managing three independently

➤ Coordinated with leadership and other project managers to establish priorities and proactively determine the direction of the development team across various projects

➤ Communicated with customer stakeholders and internal project teams the system requirements, the scope of work, goals, and additional tasks and responsibilities to all necessary participants

➤ Provided all stakeholders with system and business updates on a predefined schedule, monthly, weekly, or more frequently

➤ Recognized as the internal systems configuration specialist; trained many staff members in the configuration and project management divisions on the best utilization of internal software systems

Client Relationship Manager

Elite Touch Cleaning Services

May 2017 - December 2018 / Charlotte, NC

➤ Managed 74-78 commercial clients

Technical Systems Configuration Manager

HealthSpace Data Systems, Ltd.

February 2016 - May 2017 / Charlotte, NC

➤ Built modules and forms to customer's expectations provided by the Director of Operations
